

MasterSlicer 1A

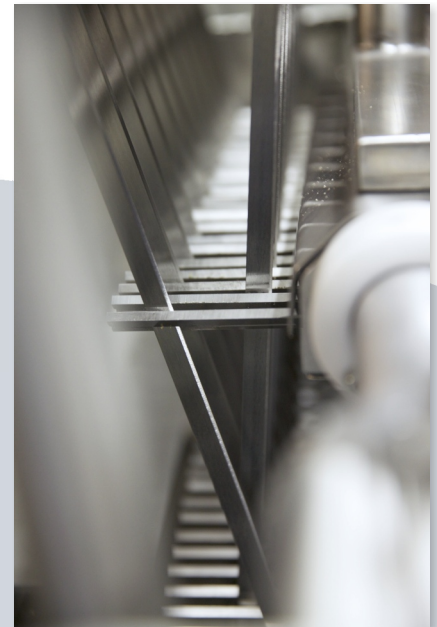

Industrial band slicer with variable slice thickness

First time ever a high performance industrial band slicer has an ability to seamlessly vary thickness of a bread slices. The function is fully automatic - slice thickness is selected on the touch screen and the system does the rest. Due to extra firm blade support, MasterSlicer 1A can handle bread loaves of all types and consistencies. MasterSlicer 1A is a perfect choice for any modern bakery where speed and flexibility are of a priority.

Patent protected adjustable lattice

Specs

Slicer type	Industrial band blade slicer with variable slice thickness
Adjustment range	Pre-selectable, range 10-15mm or 11-17mm or 1/2" - 3/4"
Suitable bread types	All bread types; white bread, dark bread, sourdough bread
Infeed system	Motorized bottom, top and lateral conveyors
Blades	163 inches long blade loops, various profile options
Slicing capacity	Up to 70 loaves per minute, depending on the bread type
